

# Vibra Shake™ Dust Collector

**Models VS-550, -1200, -1500, -2400, -3000**

**A self-cleaning collector that is best for intermittent applications where high collection efficiency is essential, such as reclaiming precious metals.**

- Two-stage cartridge for high-efficiency filtration on both coarse and fine dusts.
- Compact, self-contained collector design allows placement flexibility and saves floor space.
- Preassembled for easy, low-cost installation—no need for compressed air.
- Selection of inlet size and location for installation flexibility.
- Recirculates filtered air saving heating and cooling costs.
- Productivity increases and morale improves by providing a cleaner working environment.
- Reduces plant maintenance costs.

**VS-550**

**Vibra Shake cartridge features patented Pleatloc™ corrugation that assures uniform pleat spacing for better self-cleaning and longer filter life.**

- Filter screen captures coarse and fibrous particles.
- Submicron particulates pass through the filter screen and are trapped by the inner layer of media.
- Galvanized outer liner protects filter media.
- Easy filter changeout for quicker maintenance.

## Operational Explanation

Automatic mechanical self-cleaning ensures the filter cartridge is cleaned every time the unit is shut off. It does an excellent job more cost effectively, and it does it quietly because of heavy-duty construction, special sound-attenuating material, and a vibration isolation motor mount.
